## ABOUT

Hi, I'm Abdo, I'm an enthusiastic and humorful guy with roots in Egypt and born in Austria, who loves to programm and help others. I am a really big open source enthusiast. Currently I am working on a Open Source delivery Platform build on top of "Svelte-Kit" and the "Koa" Framework. The beginning of 2021 and the months after were a bit tough because my father had died, but my friends and family were here and gave me strength and that's why I love helping and collaborating with other because they give you the power to do anything. In my free time I like watching Anime, TV-Shows, playing basketball, football, going out or to the gym and reading books and comics.

## EDUCATION

2010 - 2015

**GRG ERLGASSE**

2015 - 2020

**HTL MOEDLING**

- Studied Electronics and Technical Computer Sciences/Informatics

2020 - Now
