

## Who Am I

Hi, I'm Abdo, I'm an enthusiastic and humorous guy with roots in Egypt and born in Austria, who loves to program and help others. I'm a huge open source enthusiast and really interested in computer graphics. Currently, I'm working on 2 projects:

- 3D Computer Graphics with WebGPU (Bachelor Thesis)
- A OSS restaurant delivery platform build with Svelte-Kit and Fastify.

The beginning of 2021 and the months after were a bit tough because my father had just died, but my friends and family were here and gave me strength and that's why I love helping and collaborating with other because they give you the power to do anything. In my free time I like watching Anime, TV-Shows, playing basketball, football, going out or to the gym and reading books and comics.
